## DETAILED ACTION

### *Election/Restriction*

1. Applicants' cancellation of claim 39 and amendment of claim 36 in the **Amendment And Reply Under 37 C.F.R. § 1.111** (Paper No. 15) is acknowledged.
2. Claims 36, 37, 40, 41, 43, 44, and 46-49 are under consideration in this Office Action.

### *Claim Rejections - 35 U.S.C. § 112, 1st Paragraph*

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:  
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 46 and 47 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are directed to any method for identifying compounds that inhibit sister chromatid separation using any human SCC1 substrate or a fragment, variant, or cleavable fragment thereof. The specification, however, only provides a single representative species encompassed by these claims: a human SCC1 protein substrate consisting of the amino acid sequence of SEQ ID NO: 1. There is no disclosure of any particular structure to function/activity relationship in the single disclosed species. The specification also fails to describe additional representative species of these polynucleotides by any identifying structural characteristics or properties for which no predictability of structure is apparent. Given this lack of additional representative species as encompassed by the claims, Applicants have failed to sufficiently describe the claimed invention, in such full, clear, concise, and exact terms that a skilled artisan would recognize Applicants were in possession of the claimed invention.

***Claim Rejections - 35 U.S.C. § 112, 2nd Paragraph***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 36, 37, 40, 41, 43, 44, and 46-49 are again rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The claims do not recite steps that show how the inhibiting effect of the test compound inhibits sister chromatid separation in eukaryotic cells. It appears that the method steps describe a method for identifying a compound that inhibits the proteolytic activity of separin instead of a method for identifying a compound that inhibits sister chromatid separation. Applicants have not presented arguments in Paper No. 15 to traverse this rejection.

7. Claims 46 and 47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's arguments filed January 21, 2003 (Paper No. 15) have been fully considered but they are not persuasive. Applicant's position is that the specification shows how variants can be generated. However, the specific sequence/structure of the human SCC1 "fragment or variant thereof" is not known and not defined in the specification. One cannot determine when a protein is or is not a fragment or variant of a substrate SCC1 protein. Amending the claims to specifically recite SEQ ID NO: 1 as the human SCC1 substrate may overcome the rejection.

***Conclusion***

8. No claims are allowed.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

• Art Unit: 1652

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
